● Recommended format ○ Alternative format; fit-dependent — Not selected for the pictured format

Select the format first. Final package size and inserts are matched to the tool dimensions and weight.

Recommended starting points

SDS DRILL BITS

P01 SDS Shank Hanger Clip

P02 / P05 / P06 Clear tube options

P14 Assortment case for drill bit sets

Visible single-tool display or enclosed protection.

CHISELS

P01 SDS Shank Hanger Clip

P04 Hanging Clear Pouch

P05 / P08 / P10 Protective containers

Select the pack around the blade width and tool length.

TCT CORE BITS

P06 / P07 Round containers

P11 Deep Blister Pack

P12 / P13 Display box or carton

Choose an insert with clearance around the carbide teeth.

BUSHING BITS

P08 / P10 Square containers

P12 Clear Display Box + Base

P13 Printed Folding Carton

Match the internal width to the head and support the tool.

Specify the packaging code, tool dimensions and quantity when requesting an OEM quotation.

Retail hang packs

P01

SDS Shank Hanger Clip

PRIMARY USE

SDS drill bits and chisels.

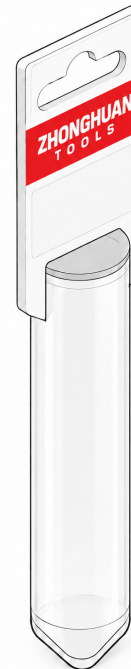

A compact display card with a moulded shank clip. The tool remains visible below the card.

FIT CHECK

Match the SDS shank profile and verify retention under the packed tool weight.

P02

Slim Hanging Tube

PRIMARY USE

Individual SDS drill bits.

A narrow enclosed format for slender tools, with the brand and product label on the top card.

FIT CHECK

Check usable length, tip clearance and the width of any chisel blade.

Transparent pouches

P03

Clear Header Bag

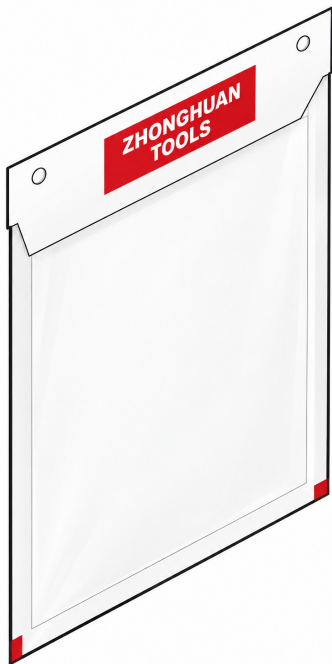

PRIMARY USE

SDS drill bits and light sets.

A clear bag with a branded header. A simple display format for individual tools or small assortments.

FIT CHECK

Secure the contents. Pointed or sharp tools need a tip cover or protective insert.

P04

Hanging Clear Pouch

PRIMARY USE

SDS drill bits and chisels.

A slim transparent pouch with a printed hanging header for individual drill bits and chisels.

FIT CHECK

Choose the pouch length and width to suit the tool. Add tip protection for pointed or sharp ends.

Transparent tube formats

P05

End-Cap Tube + Header

PRIMARY USE

Long SDS drill bits and chisels.

A transparent tube with separate end caps and a large header card for retail identification.

FIT CHECK

Verify the usable tube length, head clearance and retention of both end caps.

P06

Round Hanging Tube

PRIMARY USE

SDS drill bits and TCT core bits.

A round clear container with a hanging header and a wraparound brand label.

FIT CHECK

Check the inside diameter against the widest tool head, then confirm length and closure.

Rigid protective containers

P07

Ribbed Round Container

**PRIMARY USE**

Compact TCT core bits.

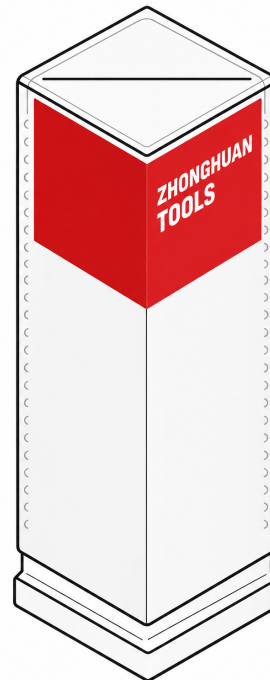

A broad cylindrical format with a hanging tab. Round-hole and slot-hole artwork variants are grouped here.

FIT CHECK

Confirm the core diameter, tooth clearance and an insert to prevent movement.

P08

Square Protective Container

**PRIMARY USE**

SDS tools and bushing bits.

A square-section, non-hanging container for enclosed tool presentation and storage.

FIT CHECK

Check internal width and length. Broad heads need a fitted cavity and secure closure.

Square hanging tubes

P09

Square Tube with Label

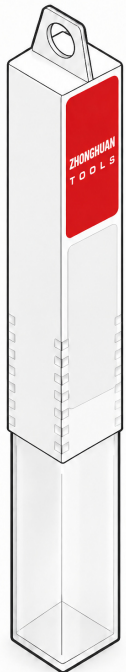

PRIMARY USE

SDS drill bits and chisels.

A long square-section clear tube with a large printed label area, keeping part of the tool visible.

FIT CHECK

Select the usable tube length and internal width to match the tool and its head.

P10

Square Hanging Container

PRIMARY USE

SDS tools and bushing bits.

A long box-like container with a hanging tab and a front label panel. Both hanging-hole variants belong here.

FIT CHECK

Match the inside dimensions to the tool. Verify the hanging tab and base under the packed weight.

Deep display formats

P11 Deep Blister Pack

PRIMARY USE

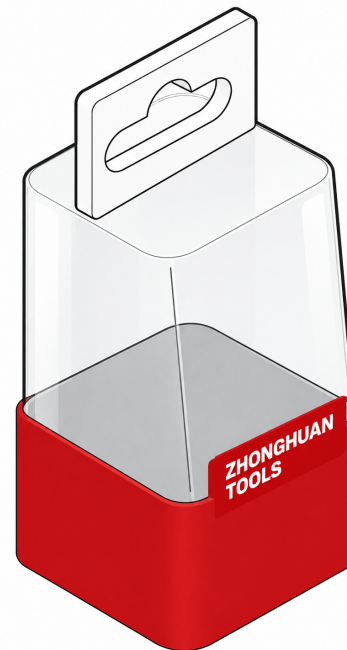

Compact TCT core bits and short tools.

A deep clear cavity on a branded backing card, suited to a product-specific retail layout.

FIT CHECK

The cavity and restraint must be shaped for the actual tool, especially wide or heavy heads.

P12 Clear Display Box + Base

PRIMARY USE

TCT core bits and bushing bits.

A broad clear display box with a solid-colour base and an integrated hanging tab.

FIT CHECK

Use a fitted insert to hold the body or head. Check tooth clearance, closure and hanging strength.

Cartons & assortment cases

P13

Printed Folding Carton

PRIMARY USE

TCT core bits and bushing bits.

A fully enclosed branded carton, with an insert selected for the tool and its accessories.

FIT CHECK

Use a longer box for drill bits or chisels. Set the board strength and insert for the packed weight.

**P14**

Hanging Assortment Case

PRIMARY USE

SDS drill bit assortments.

A compact rectangular case with a large branding area for a multi-piece tool assortment.

FIT CHECK

Match each drill bit or chisel to an insert or holder that keeps the set securely in place.
